

HW#5 Cyber-Security**REF:** *Cyber Security PPT Slide Deck & DHS-ICS CERT Web Training Module*

1. What do the following acronyms stand for?:
 - ICS:
 - SCADA:
 - CDA:
 - SSEP:
2. What are three common cyber-attack delivery methods?
3. What are the seven elements of the 'Cyber Kill Chain'?

Which of these could be effectively mitigated by minimizing the amount of facility/personal information available online?

4. Are all facility digital assets considered Critical Digital Assets?
Why or why not?
5. What "CDA Configuration Information" should be audited at a minimum?
6. What externally provided services are many facilities (inter)dependent on?
7. Which database may be utilized to find 'current security issues, vulnerabilities and exploits'?

8. When tracing network maps, what type of information should be included?

9. List 5 different items that cyber-security procedures should cover?

10. What are the three Attacker Threat Indices?

Which threat index is most impacted by information about facility CDA published online?

11. What are the three Vulnerability Indices?

Which is most impacted by an operating system with a high CVSS Base Score?

12. What was the most prevalent Risk Index value for audited PULSTAR systems?

13. List 5 'Hardware Solutions' based defense-in-depth mitigations?
