

AT245

ANTI-TRAUMA Material

Aramid Uni-Directional Material for Anti-Trauma in Soft Armor Applications

This material is part of a new generation of UD materials capable of delivering anti-trauma system in addition to it's ballistic protection properties. This new and revolutionary material combines uni-directional aramid fibers in a tension free matrix capable of absorbing more energy than similar woven products.

UD 245 is provided in rolls of product.

Applications

- Concealable and Tactical body armor for Police, Military and VIPs.
- Trauma reduction in soft armor applications.

Product Characteristics

- Extreme reduction of blunt trauma – the injury caused by an impacting bullet.
- Excellent stopping power with multi-hit and angle shot benefits.

Characteristics		
Width	[cm]	160
	Test method	ASTM D3774-96
Length	[m]	150
Thickness	[mm]	0.2
Areal Density	[gm/m ²]	245 +/- 10
	Test method	ASTM D3776
