

Things I Learned

Jose Barbeito

4/22/24

1. VLE equations such as Raoult's, Henry's and more
2. Using McCabe Thiele analysis to determine number of stages in column
3. Multicomponent Distillation
4. Log mean and de-dimensionalizing equations
5. Diffusion of species, dependant on time
6. Mass transfer
7. Membrane Separation
8. Mean Residence Time
9. Equilibrium Stage Absorption
10. Mass Transfer Coefficients
