

In-Class Exercise 6 (solution)

Recognizing unit cells & plane groups

FeS₂, Marcasite

No mirror lines of symmetry (m) due to asymmetric basis

Classification: oblique lattice; plane group:
p2

Possible unit cell, but does the basis support rectangular pt group symmetries?

No mirror, no glide
→ cannot be one of rectangular plane groups, pm, pg, cm, p2mm, p2mg, p2gg, c2mm
